

Moreland Commission
To Investigate Public Corruption
in New York State

October 15, 2013

Dear Member Commissioner and Special Advisors:

My name is Margarita Walter, a disabled mother of three children who was a witness at the recent public hearing on September 17, 2013 conducted in NYC. I write this letter to ascertain the status of this investigation as it pertains to my matter.

I implore this Commission which was established to investigate public corruption to stop the victimizing of myself and others similarly situated for courageously reporting of steering and racketeering by high powered attorneys working in concert with certain judges, among other improprieties around the Westchester County area.

Moreover, this Commission should be mindful that the aforementioned officers of the court engaged in activities that undermined the New York State voting system to elect Supreme Court Judges in the 9th Judicial District. As United States Attorney of the Southern District, Preet Bharara stated, "A galling injustice that sticks in the craw of every thinking New Yorker is the almost inviolable right of even the most corrupt elected official, even after being convicted by a jury and jailed by a judge, to draw a publicly funded pension until his dying day." It is compelling to view Corrupted Supreme Court Judges as New York State elected public officials consistent under the same category referenced by Mr. Bharara, as they have obstructed their public trust to the taxpaying New York constituents and more.

My matter underscores a history of pervasive corruption within the State of New York and the battery of retaliatory tactics, indicative by the pattern and practice of ongoing abuse of power, gender and ethnic discrimination, gross conflict of interests, uncontrolled contravention of civil and ADAAA Federal and State mandates and more.

I would appreciate expeditious feedback relevant to my testimony and advise if any further information is necessary, accordingly.

Very truly yours,

Margarita T. Walter
